location: Tangail, Dhaka, Bangladesh

Career Summary

Dynamic Frontend Developer and Team Leader with 4+ years of experience. Specializes in providing scalable solutions, pixel-perfect responsive design with Next.js, React.js, and cutting-edge technologies. Familiar with full-stack development, adept at optimizing performance.

Technical Skills

Development: HTML5, CSS3, Typescript, TailwindCSS, React.js, Next.js, Redux, Redux toolkit, React-redux, SWR, Scss, Redux-thunk, GraphQL, Apollo Client, ShadCN, Ant Design, Bootstrap, Material UI, Firebase, Node JS, Express, MongoDB, Mongoose.

Development Tools: VS Code, Firebase, Yarn, Npm, Git, Github, Dev tools, Redux dev tools.

Programming language: JavaScript (ES-6), TypeScript.

Experience

Frontend Developer

Newroz Technologies Limited,

Nov, 2024 — Present

- Led the **frontend architecture and development** of a **fintech dashboard from scratch**, delivering a scalable, high-performance, role-based platform.
- Designed and implemented **multi-role organization management** with secure authorization flows and clean state management.
- Integrated **multiple payment gateways** (FastPay, Zain Cash, QI Card, AsiaPay) for Iraq's **official national lottery platform (IraqLoto)**.
- Built **mini-app architecture** to embed IraqLoto within the **Super Qi Super App**, enabling seamless **SSO authentication** and user onboarding.
- Implemented **web and in-app push notifications** (Firebase, OneSignal) to support real-time communication and user engagement.
- Collaborated cross-functionally with **German (TQG) and Dubai-based teams**, maintaining production applications including **SHOTMOB**, a multilingual sports platform serving thousands of users.

Technology: TypeScript, React.js, React-router-dom, tailwind.css, Axios, SWR.

Frontend Engineer

Sicunet Inc,

Feb, 2024 — Sep, 2024

Update Sicunet's Access Control System site, leveraging cutting-edge technology to enhance performance by over 60%.

- Improved **Access Control System performance by 60%+** using modern React and optimized data-fetching strategies.
- Designed and implemented **robust authorization architecture**, including license management, role-based access, and system partitioning.
- Delivered **230+ production pages** across core modules (Dashboard, Video, Access, Reports, Devices, System, etc.) with a consistent, modern UI.
- Built an **interactive, draggable dashboard** to visualize real-time device status and system health.
- Developed **custom video streaming and playback** features supporting live view and time-based controls.
- Established **reusable UI architecture** using atomic components, custom hooks, and server-side pagination with URL-synced state.

Technology: TypeScript, React.js, React-router-dom, hls.js, tailwind.css, Axios, SWR.

Frontend Developer

Texon Limited,

Jan, 2022 — Jan, 2024

- Built and scaled the **frontend and admin panel** for a **multi-vendor e-commerce platform (Sneho)** in close collaboration with backend teams.
- Developed complex **admin modules** covering catalog, orders, inventory, finance, analytics, staff management, and system settings.
- Delivered **scalable, user-friendly interfaces** that improved operational efficiency across business workflows.
- Implemented **state management and data layers** using Redux Toolkit, GraphQL, and REST APIs.
- Contributed to **performance optimization and maintainable architecture** across multiple large modules.
- Designed and developed a **corporate portfolio website** for Unipolar, showcasing products, blogs, careers, and projects.

Technology: TypeScript, React.js, Next.js, Redux-toolkit, Redux-Thunk, React-router-dom, Axios, GraphQL, Apollo Client, SWR.

MERN Stack Developer

In a Quick Menu,

Jun, 2021 — Dec, 2021

Developed a restaurant business management platform that included a responsive MERN Stack website and app.

- Developed a **full MERN-based restaurant management platform**, including web and mobile applications.
- Built **end-to-end features** for order management, product control, discounts, and real-time dashboard insights.
- Implemented **QR-based food ordering** with order tracking and dynamic order updates.
- Designed **scalable frontend and backend architecture** using MVC patterns and reusable components.

Technology: React JS, SASS, Redux, Redux-Thunk, React-router-dom, Axios, Ant Design, React-Native, Imgbb, Node JS, Express JS, MVC pattern, MongoDB with Mongoose, Authentication.

Frontend Developer

In Sootram as an intern,

Apr, 2021 — May, 2021

- Collaborated directly with the founder to build a **learning platform for creators and users**.
- Developed a **series-based quiz system**, enabling creators to publish quizzes and users to test their knowledge.
- Designed and implemented a **high-conversion landing page** using modern UI principles.
- Contributed to **early-stage architecture and feature planning**.

Technology: React.js, Next.js, Redux-toolkit, Redux-Thunk, React-router-dom, Axios, Material-UI.

Project

BD-Property

[Live Site](#) | [Github Repository](#)

It's a fully responsive, interactive real estate platform enabling users to buy and rent properties.

- Built a **responsive real estate platform** for buying and renting properties using modern Next.js architecture with **scalable state management and data-fetching patterns**.
- Implemented **advanced search and filtering** with dynamic listings driven by URL-based queries.
- Designed **data-rich property detail pages** and an interactive **loan calculator** for pricing estimation.

Education

Diploma in Electronic Engineering | CGPA: 3.39/4.00 | Duration: 4 Years (Jan 2018 - Jan 2022)
